

### REMARKS

Applicant previously filed a Preliminary Amendment. By this Amendment, Applicant has provided a new sheet of drawings of Figure 5. Figure 5 has been provided to show the screw 4 extending through the tank 1. This is an important and novel aspect of the invention and finds support in paragraph [0021], lines 5-7 and paragraph [0026], lines 18-19 of the original specification. Applicant has also provided a substitute specification to provide a description of Figure 5. The changes made to the specification are based on the previous substitute specification that was submitted with the Preliminary Amendment. No new matter has been submitted.

Favorable action on the merits is requested.

Respectfully submitted  
for Applicant,
